- Microfluidics
- Micropropulsion
- Turbulence
- Discrete Phase

PAPER ACCEPTED

A Computational Analysis of Fluid Mixing Characteristics Inside a Microchannel **Pulsating Streams**

16th Asian Congress of Fluid Mechanics

♀ JNCASR Bengaluru

December, 2019

This work is done to analyze the use of pulsating streams for possible enhancement of fluid mixing in a microchannel at low Reynold numbers. https://doi.org/10.1007/978-981-15-5183-3_20

PROJECTS

- Wheelchair with smart control
- Changed over an ordinary wheelchair to a mechanized one with least expense
- For low income individuals with special needs
- GPS navigation and emergency alert system was included
- Android project on emergency situation
- A very basic android application for one-click notification
- Developed this whole project using an open source web application

EXPERIENCE

■ Research Experience

Macro-to-Micro scale Fluids Engineering Lab (M μ FEL)

- P Dept. of ME, BUET
- Movember, 2020 Present
- · Working as a Research Assistant
- **■** Teaching Experience

Dept. of ME, Sonargaon University (SU)

- Working as a Lecturer
- Industrial Experience

In Plant Trainee

- **♀** The ACME Laboratories Ltd.
- Performed inspection of different subsystems and equipment
- Reported daily to the Chief of the Engineering Department

STRENGTH

- Scientific Computational Tool: Matlab
- Programming Language: C, Python, Scheme
- FEM Modeling Tool: ANSYS
- Design Tool: AutoCAD, Solidworks
- Plotting and Graphics Tool: Tecplot, Inkscape
- OS: Windows, Linux (Ubuntu)

EXTRACURRICULAR ACTIVITIES

- Intra-Cantt. Math Olympiad
- 1st runner up team, 2013
- Bangladesh Mathematical Olympiad
- Academic Team Member, 2016 Present
- 1st runner up, Divisional round, 2012
- 2nd runner up, Divisional round, 2011
- Bangladesh Astronomical Olympiad
- 2nd, Divisional round, 2011
